

## *Universal underpacking for printing blankets*

Finito® is an **innovative product**, designed to change both the technological and commercial concept of underpacking blankets. This universal underpacking for offset presses offers a better mechanical stress resistance and print quality. Versatile and easy to use thanks even to the handy box "ready-to-use".

Finito® replaces old underpacking blankets and calibrated papers with an exclusive innovative material, eliminating all the storage and handling problems of conventional underpacking. The exclusive concept of this new underpacking is to offer a ready to use sheet in the correct thickness recommended by the press manufacturer.

### **Benefits of using Finito®**

- High usage flexibility ;
- Stability of the layer during printing runs ;
- Long-lasting ;
- Solvent resistant ;
- Optimal compression set resistance and optimal rebound properties ;
- Resistant to mechanical stress ;
- Self-levelling with a high capacity to adapt to the profile of the cylinder;
- Better uniformity of rule-screening and solids transfer ;
- Better slur stability during printing ;
- Environmentally friendly;
- Fire resistant

## How does Finito® work?

Finito® is installed on the press just like underblankets and/or calibrated papers.

## Technical structure of Finito®

The core structure is a modified TPU (thermoplastic polyurethane) – used in various thicknesses - calendered to a PES film (polyester). PES films can also be inserted inside the polymeric master.

One or more reusable PES films (thickness of 0.05 mm) can be applied using stick-tear off technology.

Finito® is available in different versions:

- S no adhesive yellow color;
- W adhesive version rubine color;
- B no adhesive special made for high thickness blue and yellow.

	<b>FINITO S</b>	<b>FINITO W</b>	<b>FINITO B</b>
<b>Description</b>	Elastomeric Film (PES and elastomer) in various thicknesses, characterized by Over Thickness removable layers	Elastomeric adhesived Film (PES and elastomer) in various thicknesses	PES film in Elastomeric blend
<b>Color</b>	<b>Acid green</b>	<b>Red</b>	<b>Acid green</b>
<b>Surface</b>	Smooth	Smooth	Smooth
<b>Tolerance</b>	± 10 µm	± 10 µm	± 10 µm
<b>Over Thickness removable</b>	50 ± 5 µm	Adhesived PES	
<b>Hardness (Shore A)</b>	76	76	86
<b>Cylinder side</b>	PES	Water based (Adhesive)	BLU Elastomeric film

The logo for Finito, featuring the word "Finito" in a bold, sans-serif font. The letter "o" is replaced by a stylized green and yellow graphic element that resembles a drop or a specific character.

is designed, developed and manufactured by Printgraph and is a worldwide patented product.
