

# Dyna<sup>®</sup> Solar

## Innovative solution for cleaning solar panels

Dyna<sup>®</sup> Solar Cleaner is a concentrated water based detergent, ideal for cleaning solar and photovoltaic solar panels.

Dyna<sup>®</sup> Solar Cleaner needs to be diluted with water before its usage.

Its characteristics allow to effectively remove deposits like smog, grease, limestone, bird feces and other deposits that build up on the glass surface. Thanks to the special surface actives ingredients, the product leaves an anti static film that reduces the accumulation of deposits. Consequently the product increases the time between maintenance cycles and the efficiency of the solar panel.

Dyna<sup>®</sup> Solar Cleaner also cleans aluminum frames and rubber based seals without any risk for corrosion and or swelling.

### ■ FEATURES

- Efficient in its use; dilution 2 liter concentrate per 100 liter which equals a dosage of 2%
- Biological degradable
- Anti static properties
- Restores solar absorption capacity to maximum levels at regular usage

### ■ APPLICATION: Bucket method

- Apply dosage as described
- Apply the solution with a clean (micro-fibre) cloth, sponge or soft brush
- Lightly rub the solar panels
- Clean from the top to the bottom
- Rinse with some clean water to drive residues away
- Rinse cloth, sponge or brush regularly

### ■ APPLICATION: Spray method

- Apply dosage as described
- Fill the spray system
- Spray the diluted cleaner on the surface
- Clean the surface with wipe/soft brush that comes with the spray gun
- Clean from the top to the bottom
- Rinse with some clean water to drive residues away

### Safe usage and storage

keep away from children

avoid eye contact, in case of eye contact rinse thoroughly with clean water
